REFINED PETROLEUM PRODUCTS

Certain changes in concept and presentation are being introduced in this report to meet more adequately the needs of industry and government and, in some instances, to reflect more accurately current industry practices. One change in concept and terminology, affecting Tables 1 - 4, is the inclusion of condensate and natural gasoline with crude oil as "crude oil and equivalent". The effects of this and other changes are indicated below.

TABLE 1 - New Supply and Disposition of Crude Oil and Equivalent, by Source

This is a new table which will show the supply and disposition of (a) Canadian crude oil and equivalent, by province of origin, from production to its delivery to both domestic and export markets, and (b) foreign crude oil and equivalent entering Canada. Data for January 1963 were not available in time for inclusion of the table in this issue, but it is hoped that it will be included in the February report. Until production data are available on as current a basis as those for disposition, it is probable that this table will continue to be issued a month later than the rest of the information in this report.

TABLE 2 - Crude Oil and Equivalent Received by Canadian Refineries

Aside from the re-arrangement of sources in alphabetical order, the only change in this table is the inclusion of receipts from New Brunswick fields.

TABLE 3 - Raw Materials Supply, Canadian Refiners

The major changes in this table are the separation of refinery receipts by means of transportation, the deletion of a separate category for "Natural Gas Liquids", and the provision for refinery sales of crude oil and equivalent after receipt in refinery tankage. Receipts and inventories of condensate and natural gasoline, formerly included in "Natural Gas Liquids", have been included in crude oil beginning with July, 1962. Receipts of propane, butane and propane/butane mixes, part of which was formerly included under "Natural Gas Liquids", are now shown in two categories:

1. Refinery receipts of propane/butane/mixes from gas processing plants for commingling with crude and equivalent are shown in Table 3, item 1 (b), and
2. Other receipts of propane/butane/mixes are shown in Table 4 under "Propane, butane and propane/butane mixes".

TABLE 4

Commencing with the January 1963 issue, two changes have been made which affect all products. "Refinery production" now reads "From crude oil and equivalent, and commingled propane/butane/mixes" rather than "From crude". "Blending agents and additives" has been replaced by "Other materials used". The latter item no longer includes propane, butane and propane/butane mixes used for blending purposes. These are now included in production and receipts in the product "Propane, butane and propane/butane mixes".

Other changes affect individual products. The former product category, "Liquefied Petroleum Gas" is renamed "Propane, butane and propane/butane mixes". The figures shown in this section are those reported by refiners, distributors and natural gas processing plant operators listed in the back of this publication. Sales of propane, butane and mixes by gas processing plants, formerly shown in Table 5, are now included in the product "Propane, butane and propane/butane mixes" in Table 4. Production of the propane/butane content of petro-chemical feed stocks is now included in the production of propane, butane and propane/butane mixes and transferred into petro-chemical feedstocks via inter-product transfers.

A new item, "Receipts in Canada - From gas processing plants", is included for the first time and is equivalent to total domestic and export sales of propane, butane and propane/butane mixes by gas processing plant operators listed in the back of this publication, excluding the amounts reported in Table 3 as a raw material.

REFINED PETROLEUM PRODUCTS

Certain changes in concept and presentation have been introduced in this report to meet more adequately the needs of industry and government and, in some instances, to reflect more accurately current industry practices. One change in concept and terminology, affecting Tables 1 - 4, is the inclusion of condensate and natural gasoline with crude oil as "crude oil and equivalent". The effects of this and other changes are indicated below.

TABLE 1 - New Supply and Disposition of Crude Oil and Equivalent, by Source

This is a new table which will show the supply and disposition of (a) Canadian crude oil and equivalent, by province of origin, from production to its delivery to both domestic and export markets, and (b) foreign crude oil and equivalent entering Canada. Data for January 1963 were not available in time for inclusion of the table in this issue, but it is hoped that it will be included in the March report. Until production data are available on as current a basis as those for disposition, it is probable that this table will be issued later than the rest of the information in this report.

TABLE 2 - Crude Oil and Equivalent Received by Canadian Refineries

Aside from the re-arrangement of sources in alphabetical order, the only change in this table is the inclusion of receipts from New Brunswick fields.

TABLE 3 - Raw Materials Supply, Canadian Refiners

The major changes in this table are the separation of refinery receipts by means of transportation, the deletion of a separate category for "Natural Gas Liquids", and the provision for refinery sales of crude oil and equivalent after receipt in refinery tankage. Receipts and inventories of condensate and natural gasoline, formerly included in "Natural Gas Liquids", have been included in crude oil beginning with July, 1962. Receipts of propane, butane and propane/butane mixes, part of which was formerly included under "Natural Gas Liquids", are now shown in two categories:

1. Refinery receipts of propane/butane/mixes from gas processing plants for commingling with crude and equivalent are shown in Table 3, item 1 (b), and
2. Other receipts of propane/butane/mixes are shown in Table 4 under "Propane, butane and propane/butane mixes".

TABLE 4

Commencing with the January 1963 issue, two changes have been made which affect all products. "Refinery production" now reads "From crude oil and equivalent, and commingled propane/butane/mixes" rather than "From crude". "Blending agents and additives" has been replaced by "Other materials used". The latter item no longer includes propane, butane and propane/butane mixes used for blending purposes. These are now included in production and receipts in the product "Propane, butane and propane/butane mixes".

Other changes affect individual products. The former product category, "Liquefied Petroleum Gas" is renamed "Propane, butane and propane/butane mixes". The figures shown in this section are those reported by refiners, distributors and natural gas processing plant operators listed in the back of this publication. Sales of propane, butane and mixes by gas processing plants, formerly shown in Table 5, are now included in the product "Propane, butane and propane/butane mixes" in Table 4. Production of the propane/butane content of petro-chemical feed stocks is now included in the production of propane, butane and propane/butane mixes and transferred into petro-chemical feedstocks via inter-product transfers.

A new item, "Receipts in Canada - From gas processing plants", is included for the first time and is equivalent to total domestic and export sales of propane, butane and propane/butane mixes by gas processing plant operators listed in the back of this publication, excluding the amounts reported in Table 3 as a raw material.

TABLE 1, NEW SUPPLY AND DISPOSITION OF CRUDE OIL AND EQUIVALENT, BY SOURCE

As indicated in the notes included in the January and February issues of this report, this is a new table designed to show the supply and disposition of (a) Canadian crude oil and equivalent, by province of origin, from its production to its delivery to both domestic and export markets, and (b) foreign crude oil and equivalent entering Canada. It is essential to recognize that, in contrast to the usual presentation, the table does not represent the supply and disposition of crude oil and equivalent within particular geographic areas.

The basic data are derived from three main sources:

Provincial Governments: Domestic production, deliveries to refineries, deliveries to other purchasers, field and plant inventories, field and plant use.

Pipeline Companies: Deliveries to refineries, transporters' inventories, pipeline fuel, exports by pipeline.

Refineries: Refinery receipts.

Ideally, the data presented in this table should agree in their entirety with those published by provincial governments. From a practical standpoint, however, certain differences in concept prevent such agreement. For example, Alberta and Saskatchewan currently publish data on oil moving eastward by pipeline based on deliveries made by the Interprovincial Pipe Line Company, regardless of whether these deliveries are made direct to refineries or to connecting pipelines. Table 1, on the other hand, records all deliveries at the refinery gate in the province of receipt, thereby ensuring agreement with refinery receipts in tables 2 and 3. These differences in point of measurement account for the lack of agreement not only in deliveries but in transporters' inventories as published in Table 1 and in provincial reports. It is hoped that these and other relatively small differences in reporting by various suppliers and publishers of data will be even further reduced.

Although most items are self-explanatory, a few require clarification. Imports are, in effect, a derived figure, representing the sum of actual deliveries to refineries by pipeline and tanker, pipeline inventory changes, losses and adjustments. Field and plant inventories are located in the province of origin. However, transporters' inventories of Canadian crude oil and equivalent are the total of pipeline fill and inventories in tanks held in both Canada and the United States. Transporters' inventories of foreign crude represent the total held in Canada by pipelines. Losses and adjustments are the balancing item, incorporating all losses and adjustments reported by both producers and transporters together with any adjustments necessary to bring disposition into balance with supply.

NOTE

Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. For the past several months these figures have been in close balance and have been revised to an exact balance along with other appropriate adjustments. In the last three months these two items have been out of balance by a considerable amount and extensive resurveys have been necessary. In the interests of timeliness it is now necessary to publish the data with the above items out of balance.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- † Revised figures.
- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. For the past several months these figures have been in close balance and have been revised to an exact balance along with other appropriate adjustments. In the last three months these two items have been out of balance by a considerable amount and extensive re-surveys have been necessary. In the interests of timeliness it is now necessary to publish the data with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers - Inter-provincial - in and out." They will be corrected when the amended figures have been made available to us.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- r Revised figures.

NOTES

- . Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. For the past several months these figures have been in close balance and have been revised to an exact balance along with other appropriate adjustments. In the last three months these two items have been out of balance by a considerable amount and extensive re-surveys have been necessary. In the interests of timeliness it is now necessary to publish the data with the above items out of balance.
- . We are aware of the discrepancies that are appearing in the "Transfers - Inter-provincial - in and out." They will be corrected when the amended figures have been made available to us.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- r Revised figures.
- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. For the past several months these figures have been in close balance and have been revised to an exact balance along with other appropriate adjustments. In the last three months these two items have been out of balance by a considerable amount and extensive re-surveys have been necessary. In the interests of timeliness it is now necessary to publish the data with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers - Inter-provincial - in and out." They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butanes mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants, and storage cavern operations.

The previous six months of 1964 will be similarly revised and when completed, will be issued to subscribers.

Item "C", page 6. Receipts in Canada from gas processing plants

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Items "g" and "h", page 6. Inventories

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butane mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants and storage cavern operations.

The previous six months of 1964 will be similarly revised and when completed, will be issued to subscribers.

Item "C", page 6 - Receipts in Canada from gas processing plants:

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Items "g" and "h", page 6 - Inventories:

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

Item "q", page 6 - Net sales in Canada:

This item in the provinces of Saskatchewan and Alberta now includes deliveries of butane commingled in the crude stream. The actual amounts appear at the bottom of page 6.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butane mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants and storage cavern operations.

The previous six months of 1964 will be similarly revised and when completed, will be issued to subscribers.

Item "C", page 6 - Receipts in Canada from gas processing plants:

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Items "g" and "h", page 6 - Inventories:

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

Item "q", page 6 - Net sales in Canada:

This item in the provinces of Saskatchewan and Alberta now includes deliveries of butane commingled in the crude stream. The actual amounts appear at the bottom of page 6.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butane mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants and storage cavern operations.

Page 6 - Receipts in Canada from gas processing plants:

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Page 6 - Inventories:

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

Page 6 - Net sales in Canada:

This item in the provinces of Saskatchewan and Alberta now includes deliveries of butane commingled in the crude stream. The actual amounts appear at the bottom of page 6.
4. The revised propane, butane tables for the first seven months of 1964 are included at the end of this publication.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butane mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants and storage cavern operations.

Page 6 - Receipts in Canada from gas processing plants:

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Page 6 - Inventories:

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

Page 6 - Net sales in Canada:

This item in the provinces of Saskatchewan and Alberta now includes deliveries of butane commingled in the crude stream. The actual amounts appear at the bottom of page 6.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. Due to a change in concept, the propane, butanes and propane/butane mixes supply and disposition page of this publication has been modified. The major revision has been the inclusion of the entire supply and disposition of gas processing plants and storage cavern operations.

Page 6 - Receipts in Canada from gas processing plants:

This item in the provinces of Saskatchewan, Alberta and British Columbia now reflects total plant production.

Page 6 - Inventories:

These items in the provinces of Saskatchewan, Alberta and British Columbia now include inventories held at plants and in storage caverns.

Page 6 - Net sales in Canada:

This item in the provinces of Saskatchewan and Alberta now includes deliveries of butane commingled in the crude stream. The actual amounts appear at the bottom of page 6.

NOTES

1. Receipts in Canada from other reporting companies and Deliveries in Canada to other reporting companies should be in balance. During the first three months of 1964, these figures were in close balance and were revised to an exact balance along with other appropriate adjustments. During the past few months, however, in spite of extensive resurveys, these two items have been out of balance by a considerable amount. In the interests of timeliness, it is now necessary to publish this report with the above items out of balance.
2. We are aware of the discrepancies that are appearing in the "Transfers-Inter-provincial-in and out". They will be corrected when the amended figures have been made available to us.
3. At the request of the Industry, the propane, butane and propane/butane mixes category has been divided into separate propane and butane sections (numbers 1(a) and 1(b) respectively).

NOTES

1. During the last quarter of 1964 and January and February of 1965, details of the inter-company receipts and deliveries by reporting companies were requested from respondents. An analysis of these transactions revealed a number of reporting problems which have been corrected in the 1965 monthly publications and the revised 1964 figures will be available in the Annual Refined Petroleum Products Publication No. 45-204.
2. At the request of the Industry, the propane, butane and propane/butane mixes category has been divided into separate propane and butane sections (numbers 1(a) and 1(b) respectively).

NOTES

1. During the last quarter of 1964 and January and February of 1965, details of the inter-company receipts and deliveries by reporting companies were requested from respondents. An analysis of these transactions revealed a number of reporting problems which have been corrected in the 1965 monthly publications and the revised 1964 figures will be available in the Annual Refined Petroleum Products Publication No. 45-204.
2. At the request of the Industry, the propane, butane and propane/butane mixes category has been divided into separate propane and butane sections (numbers 1(a) and 1(b) respectively).

NOTES

1. During the last quarter of 1964 and January and February of 1965, details of the inter-company receipts and deliveries by reporting companies were requested from respondents. An analysis of these transactions revealed a number of reporting problems which have been corrected in the 1965 monthly publications and the revised 1964 figures will be available in the Annual Refined Petroleum Products Publication No. 45-204.
2. At the request of the Industry, the propane, butane and propane/butane mixes category has been divided into separate propane and butane sections (numbers 1(a) and 1(b) respectively).
3. Table 4 has been excluded from this publication as the import figures for January 1965 are not available from the External Trade Division of DBS and will be included in the May issue of Refined Petroleum Products.

NOTES

1. During the last quarter of 1964 and January and February of 1965, details of the inter-company receipts and deliveries by reporting companies were requested from respondents. An analysis of these transactions revealed a number of reporting problems which have been corrected in the 1965 monthly publications and the revised 1964 figures will be available in the Annual Refined Petroleum Products Publication No. 45-204.
2. At the request of the Industry, the propane, butane and propane/butane mixes category has been divided into separate propane and butane sections (numbers 1(a) and 1(b) respectively).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).

NOTES

Commencing with the June 1965 publication the following changes have been instituted in the compilation of Table 3, page 6, Supply and Disposition of Petroleum Products - Propane and Propane Mixes and Butane and Butane Mixes. Only finished products marketed in Canada from natural gas processing plants for consumption as fuel or petrochemical feedstocks will be incorporated into these tables. Natural gas processing plant products delivered directly to petrochemical plants are disposed of in the propane and butane tables as interproduct transfers to the "Petrochemical feedstock" table and does not enter the "Net Sales in Canada" item on the propane and butane pages.

1964 and 1965 figures for these products included the complete production and disposition from both refineries and natural gas processing plants. Revised pages for January to May 1965 inclusive will be published on the same basis as June at a later date.

Complete production and disposition tables for natural gas processing plant products will be included in the monthly "Crude Petroleum and Natural Gas" publication (Catalogue No. 26-006).
